Raymond Lee, Lynn Bellezzo Mueller, and Kenneth J. Miller. *Sex, Wage-Earner Status, Occupational Level, and Job Satisfaction* 362
Author Index for Volume 18 374

The Subject Index for Volume 18 will appear in the December 1981 issue as part of a cumulative index for the year 1981.

Now Available for Scoring

REVISED AND EXPANDED 1981 PROFILE FOR THE

Strong-Campbell Interest Inventory

(FORM T325 OF THE STRONG VOCATIONAL INTEREST BLANK)

Following the largest testing program of employed adults in history, the scoring profile for the SVIB/SCII has been revised and expanded to report 162 Occupational Scales—99 of them entirely new. The new samples average 248 people; in all, we tested 107,807 people. This is an unparalleled achievement, yet it is just what the testing profession has come to expect from the most thoroughly researched and most highly respected tool in their repertoire. No other test offers greater reliability, greater predictive or concurrent validity, or a more effective battery of interpretive techniques. And for the 1981 revision, we've given the counselor even more to work with:

A NEW PROFILE: 162 Occupational Scales, the dated scales all replaced, and the extant male-normed scales matched with new female scales, and vice versa.
A NEW MANUAL: 160 pages, extensively revised by Dr. David P. Campbell and Dr. Jo-Ida C. Hansen.
A SPANISH-LANGUAGE TEST BOOKLET: recently tested in high schools and colleges, easy to administer.

But we haven't touched the test booklet or the answer sheet. Or the other scale types, either: 6 General Occupational Themes, 23 Basic Interest Scales, an Academic Comfort Scale, an Introversion-Extroversion Scale, and a raft of Administrative Indexes. The SCII is still the only interest inventory to use both empirical and homogeneous scales, the only one to use the "Holland codes" in the interpretation of the profile. It's still easy to use, and counselors love it because they can trust the results.

Seven scoring agencies in the United States and Canada are now licensed to score the SCII. Contact your nearest agency directly. Or write us—we've described everything in a new 16-page specimen brochure, and it's free.

British Journal of Social Work

Editor: Martin Davies

Book Review Editor: Linda Hunt

Editorial Board:
Nancy Hazel, Dorothy Ogilvie, Eric Sainsbury, Ian Sinclair, Sue Walroud-Skinner

Publication: Quarterly

Subscription: Volume 11, 1981
$ 58.00 (overseas)
£19.60 (UK)

This quarterly journal which was launched in 1971 has won a deservedly high reputation in academic circles and is one of the leading journals in this particular subject area. From 1980 it will be published by Academic Press. It aims to provide social workers, their educators and other academics in the Social Sciences a broad view of the developments in social work with particular emphasis on research findings and descriptive accounts of practice. Each issue contains a comprehensive Book Review Section. The Reviewers are chosen for their high reputation in their own fields and the reviews are more than simply descriptive in that they seek to give in-depth criticisms of each of the titles chosen. In addition all the books reviewed by the book review editors are listed, which means that over a year one can be certain of finding virtually all relevant material to social work which of course provides a valuable bibliography. There is also an extensive Abstracting Section where once again Abstractors renowned in their own field discuss at length articles in journals related to social work.

Published by Academic Press for the British Association of Social Workers

From Recent Issues
D.M. Shepherd and B.M. Barraclough: Help for those bereaved by suicide. *Roger Morgan:* The treatment of enuresis amongst child clients of a social services department. *Janet Butler, Irene Bow and Jane Gibbons:* Taks-centred casework with marital problems. *Ray Jones:* Intermediate treatment and adolescents' perceptions of social workers. *Robin Means:* Which way for 'radical' social work? *David Howe:* Agency function and social work principles.

Computers and People Series

On Becoming a Personal Scientist

Interactive Computer Elicitation of Personal Models of the World

Mildred L.G. Shaw

February 1980, xvi + 332pp., £21.00 (UK only) / $48.50, 0.12.639280.3

Personal construct psychology was developed by George Kelly in the early fifties to explain how similar events could produce different behaviour in different people. Central to his theory was a view of man as a *personal scientist* forming theories about his world, testing and revising them against personal experience, and acting on the basis of them. He devised the repertory grid technique to elicit the unique dimensions along which each individual classifies his world. Using the basic philosophy of personal construct theory and the repertory grid, the author of this book has developed novel computer techniques which interact with the individual's ideas to produce, objectively and explicitly, a model of his view of the world and his attitudes towards it.
